

VkDescriptorPoolSize

```
classDiagram
    class kF_Graphics_DescriptorPoolSize {
        +DescriptorPoolSize()
        +DescriptorPoolSize()
        +DescriptorPoolSize()
        +operator=()
        +operator=()
    }
    class VkDescriptorPoolSize
    kF_Graphics_DescriptorPoolSize --|> VkDescriptorPoolSize
```

The diagram illustrates a class hierarchy. At the bottom is the base class, `kF::Graphics::DescriptorPoolSize`, which is shaded gray. It contains five public methods: three `+ DescriptorPoolSize()` and two `+ operator=()`. Above it is the derived class, `VkDescriptorPoolSize`, which is white. A blue arrow with an open triangular head points from the base class to the derived class, indicating inheritance.
