

std::false_type

```
classDiagram
    class IsStaticCastable {
        IsStaticCastable< From, To, class >
    }
    class std_false_type {
        std::false_type
    }
    IsStaticCastable --|> std_false_type
```

The diagram illustrates a class hierarchy. At the bottom is a class box for `IsStaticCastable< From, To, class >`, which is shaded gray and has three horizontal compartments. The top compartment contains the class name. Above it is a class box for `std::false_type`, which is white and also has three horizontal compartments. The top compartment contains the class name. A blue arrow with an open triangular head points from the top of the `IsStaticCastable` box to the bottom of the `std::false_type` box, indicating that `std::false_type` inherits from `IsStaticCastable`.

IsStaticCastable< From,
To, class >
