

VkSubmitInfo

```
classDiagram
    class VkSubmitInfo
    class kF_Graphics_SubmitInfo["kF::Graphics::SubmitInfo"] {
        + SubmitInfo()
        + SubmitInfo()
        + SubmitInfo()
        + operator=()
        + operator=()
    }
    kF_Graphics_SubmitInfo --|> VkSubmitInfo
```

The diagram illustrates an inheritance relationship. At the bottom is the base class `kF::Graphics::SubmitInfo`, which is shaded gray and contains five methods: three `SubmitInfo()` and two `operator=()`. Above it is the derived class `VkSubmitInfo`, which is white and has two empty compartments for attributes and methods. A blue arrow with an open triangle head points from the base class to the derived class, indicating inheritance.

kF::Graphics::SubmitInfo
