

VkImageCreateInfo

```
classDiagram
    class kF_Graphics_ImageModel["kF::Graphics::ImageModel"] {
        +ImageModel()
        +ImageModel()
        +ImageModel()
        +operator=()
        +operator=()
    }
    class VkImageCreateInfo
    kF_Graphics_ImageModel --|> VkImageCreateInfo
```

The diagram illustrates an inheritance relationship. At the bottom is the class `kF::Graphics::ImageModel`, which has a grey header and a grey body containing five methods: three `+ ImageModel()` and two `+ operator=()`. A blue arrow with an open triangle head points from this class to the `VkImageCreateInfo` class above it. The `VkImageCreateInfo` class has a white header and two empty white body sections.

kF::Graphics::ImageModel

+ ImageModel()
+ ImageModel()
+ ImageModel()
+ operator=()
+ operator=()
